RE: South Delta Improvement Project (SDIP)

Dear Director Snow:

I am a homeowner in Discover Bay, California. The SDIP proposing 4 dams that will span end to end on selected canals allowing the pumping of an additional 5,000,000 gallons of water per day to Los Angeles and other Southern California locations will rob our fragile delta environment of more fresh water. This additional enormous outflow of fresh water being sucked out of the Delta will cause the salt water to intrude further into the Delta, degrading the water quality and lowering the water level.

I don't think anyone can argue that during our last drought, the pumping to Southern California had a very negative impact on the water quality of the Delta. The existing pumping changes the natural tidal flow of the area. With the capacity to pump 5,000,000 more gallons a day, the impact could be catastrophic.

I doubt that the Southern California backers of this plan have little or no regard for the impact of the project for homeowners like me. Hi tide swings due to winter rain and restrictive water flow caused by the dams will cause major damage to our levees, homes and docks. During the summer months when we have low tide combined with the capability to pump another 5,000,000 gallons of water each day will cause the delta in my area to see ultra low areas and mud bottoms.

I have a home that is worth \$800,000 to \$1,000,000 on a fresh water bay in Discovery Bay, California with access to all the delta. Increase salinity and decreased water depth will destroy the value of my home.

Please, kill this project before it kills the Delta!

Sincerely,

Charles W. Helfrick, C. P. A.
